## TREAD END CEMENTER

### Technical Specifications

Spadone's Tread End Cement Machines are designed for the most demanding applications. For over 100 years, Spadone has manufactured rugged and dependable machines for the tire and rubber industry. The Model 8 Tread End Cement Machine is designed to handle a wide range of treads including dual extrusions. This unit is available in two configurations, both of which handle the treads flat throughout. The "C" type returns the tread in the direction from which it came and is usually positioned following the booking station. The tread is sprayed at the end of the line and then returned back to the booker for loading in tread tray trucks. The "S" configuration is designed for in-line operations.

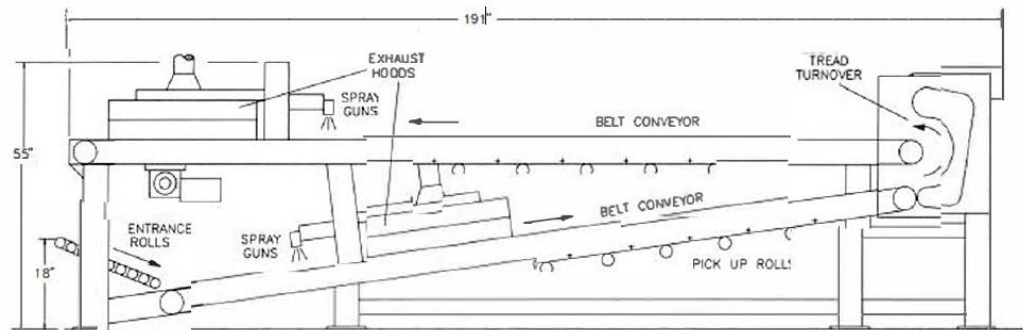

#### Features

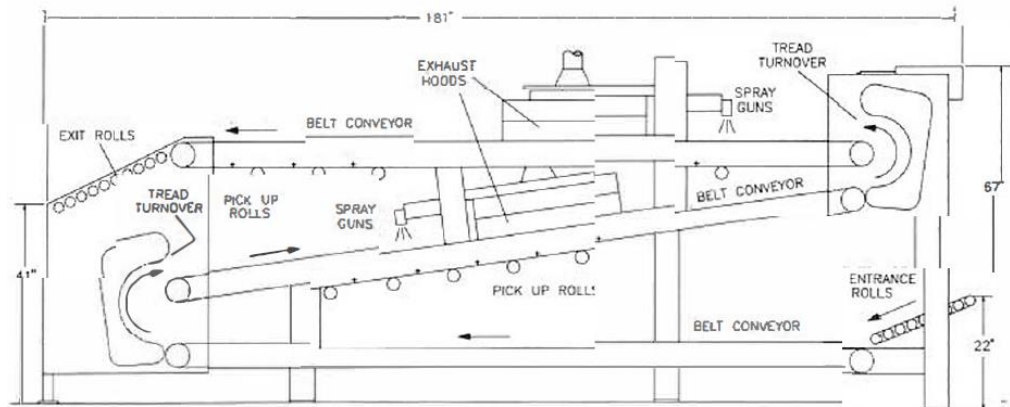

- Fully automatic
- Handles treads flat throughout
- Release coated belt conveyors
- Disposable roll sleeve
- No cement build-up
- Adjustable spray pattern
- Spray stations with two to four spray guns
- Fire extinguishing systems available
- Turnkey operation with Spadone Tread Skivers, Tread Booking Systems and Trucks
- Guarded for operator safety
- High production capability
- Rugged and dependable
- Smooth and quiet operation
- Designed to customer specifications
